The main objective of this project is to analyze retail sales data to gain actionable insights that will enhance the performance of the Coffee Shop.

Start Your Day With Coffee

Recommended Analysis

- How do sales vary by day of the week and hour of the day?
- Are there any peak times for sales activity?
- What is the total sales revenue for each month?
- How do sales vary across different store locations?
- what is the average price/order per person
- Which products are the best-selling in terms of quantity and revenue?
- How do sales vary by product category and type?

1. How do sales vary by day of the week and hour of the day?

Sales peak between **7 AM and 10 AM** and decline throughout the day. By weekday, sales are highest on **Monday, Thursday, and Friday**, while **Saturday shows lower sales**.

Overall, the analysis indicates that **sales performance is driven by morning demand and mid-week to end-of-week customer activity**, with both time and day significantly influencing sales trends.

2. Are there any peak times for sales activity?

Sales show a **strong peak during early morning hours (7:00 AM to 10:00 AM).**

3. What is the total sales revenue for each month?

Month	Total Sales Revenue
January	$81,677.74
February	$76,145.19
March	$98,834.68
April	$118,941.08
May	$156,727.76
June	$166,485.88
Grand Total	**$698,812.33**

4. How do sales vary across different store locations?

Sales vary significantly across different store locations due to factors such as customer demand, population density, and local purchasing behavior. **Sales across Astoria, Hell's Kitchen, and Lower Manhattan are relatively similar, with only minor variations observed between these locations.**

5. What is the average price/order per person?

The average price per person is $ 4.69

The average order per person is 1.44

6. Which products are the best-selling in terms of quantity and revenue?

Barista Espresso, Brewed Black tea, Brewed Chai tea, Gourmet brewed coffee, Hot chocolate , are the top 5 selling products.

7. How do sales vary by product category and type?

Sales analysis by product type indicates that **Coffee (Barista Espresso)** leads in revenue, followed by **Tea (Brewed Chai Tea)**. Within the bakery segment, **Scones** emerge as the most popular items.

Insights and Recommendations

1. Time and Day Optimization:
    1. Prioritize staffing and inventory during morning peak hours (7–10 AM) and on Monday, Thursday, and Friday.
2. Location Strategy:
    1. Maintain consistency in high-performing locations and consider localized promotions for areas with slightly lower sales.
3. Product Focus:
    1. Focus on coffee and tea products, ensuring availability of top-selling items (Barista Espresso, Brewed Tea, Hot Chocolate).
    2. Promote bakery items like Scones to increase average order value.
4. Revenue Planning:
    1. Leverage the month-to-month growth trend, particularly from March to June, for seasonal promotions and inventory management.

Conclusion: The sales analysis demonstrates clear patterns in time, day, location, and product preference. Focusing on peak hours, high-demand locations, and best-selling products will maximize revenue and improve operational efficiency.
